AESTHETICS OF AI *IMAGES*

Monday 4 April 2022, 13.15-16
Bld. 1586, room 114, Langelandsgade 139, 8000 Aarhus C

This seminar focuses on specific image practices related to AI technology. It is one thing to understand how computer vision and AI image generation work in theory, but another to analyze and discuss some of the actual, concrete, and specific image practices that are out there and (occasionally) being encountered by real persons.

Different specific image cases will be presented, and we will analyze, compare and discuss them. The concrete cases are circulated at, among other, Discord, Twitter, SuperRare auction house, art exhibitions, and Bornholm.nu

All are welcome!

Programme:

13.15-13.30: Welcome
13.30-15.45: Image cases, discussions, coffee, cake, image cases, and discussions...
15.45-16: Future activities and practicalities (seminar 9 May, centre webpage, conference panel?

This event is organized by Centre for **Aesthetics of AI Images (AIIM)**.
