

# User Experience Designer for Internship in Development Center Aarhus at Danske Bank

Are you innovative and creative and do you like working in a company that puts the customer's needs first?

We are looking for skilled user experience designer interns for Danske Bank's Development Center in Aarhus. Here we offer a dynamic and international environment with more than 450 employees. You will be trying out your skills together with technical front-end UX developers and you will be working with our customers on the visual and experimental design of our solutions.

#### **An opportunity to take part in the entire user experience design process**

As an intern, you will get many exciting and challenging assignments. You will join an experienced design team of UX designers and digital designers inside the development organization. You will be one of the frontrunners for working visually and with high usability professionalism. You will define the design gap between code and requirements and help bring solutions to life with visualizations. At Danske Bank, you will become part of a team that is dedicated to understanding the customer's needs and thereby delivers the best possible solutions. You will have a large impact on the customer experience of corporate customers because they use our applications in their everyday life.

#### **Passion and competences**

You are passionate about digital design and you like having the newest knowledge on tools and methods. You see solutions rather than limitations and you have a creative approach to your work. You have a graphic eye and a healthy amount of perfectionism. It is an advantage if you know tools like Axure, Balsamic or similar. If you know how to transform graphical

elements to CSS, HTML, and desirably Sass that would be beneficial.

#### **Curious User Experience Designer**

You are curious, and you enjoy new challenges as well as learning about design and new technologies. You are dedicated and proactive and you bring a positive approach to your assignments and independently provide solution-oriented propositions. You are a team player and take part in knowledge-sharing and sparring.

#### **Kickstart your future now!**

As an intern at Development Center Aarhus, you will be able to take the first steps in your future career. We have a vibrant environment with student assistants, master students, and recent graduates. Do you know something we don't? If we can identify an interesting research area together by the end of your internship, you can write your Bachelor's Project/Master's Thesis in our innovative study environment the 'Talent Box'.

The internship will last 20 weeks from August 2018 to January 2019 and will of course fit in with your studies. You will be employed on a full-time basis.

#### **Interested?**

If you have any questions about the position, please do not hesitate to contact us. Send your application, your CV and your grades to Talent Coordinator, Josefine Franklin Hansen, [internship@danskebank.dk](mailto:internship@danskebank.dk) before the 1st of May 2018. We hire on an ongoing basis, so e-mail us your application as soon as possible. We look forward to hearing from you.
